About me....

I spent a lot of time on various software and electronics projects and I continue with interest.....

I have worked on RFID, IOT, Embedded system, Microcontrollers, web based application projects and a series of other things.

Of course, these days I am mostly on the web with the focus on nodejs, reactjs and parse server and I will continue

Technologies

I have to explain that my abilities are related to the experiences I had. It may not be very professional in some areas, but I used it to solve my problems.

- C#, VB.Net
- Javascript, Nodejs, Reactjs, Parse server
- C, Codevision, IAR
- Java, Netbeans for smart card
- Socket Programming
- Docker for use in heroku
- Mysql
- Git
- PHP, Zend framework 3
- Altium designer for PCB
- Windows CE Builder

Skill

- Web developer
- Windows application developer
- RFID developer
- Socket Programming developer
- Serial port programming developer
- Windows Embedded 6 and CE builder 5
- Java Card Programming developer
- ...And to be continued

Education

- Bachelor of Science in Electronics
- Master of Science in Management Information Systems, All but dissertation (ABD)
